## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 – 8 and 15 - 19 drawn to a method of injection molding a synthetic resin to a metallic plate.

Group II, claim(s) 9 - 14, drawn to a method for joining a synthetic resin molded product to a metallic plate.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: All of the groupings are directed to a method for joining synthetic resin to a metallic plate, but each group has a different special technical feature not shared by the remaining group. Group I has the special technical feature of an injection metal mold and injecting synthetic resin into the metal mold for joining the injected synthetic resin to the metallic plate (see embodiment of Figures 1 and 2), wherein the metallic plate is formed to include a curling part on its peripheral edge portion. Group II does not share this special feature. Group II has the special technical feature of providing a thermoplastic synthetic resin molded product and placing the thermoplastic synthetic resin molded product in direct contact with a heated metallic plate so only the part of the thermoplastic synthetic resin molded product that contacts the heated metallic plate is allowed to melt and harden to join the molded product to the plate (see the embodiment of Figure 3). Group I does not share this feature.

3. A telephone call was made to Wenderoth, Lind & Ponack, L.L.P. on September 9, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
